# Current State

Students at California  
Community Colleges

26% of students enroll in the CCC system without a clear goal to get a degree/certification.

42% of CCC students come from non-traditional backgrounds.

Transfer students, on average, earn 13 units over the required amount to obtain an Associate's.

# Our Mission

Why is this important, and why does this matter?

## Mission

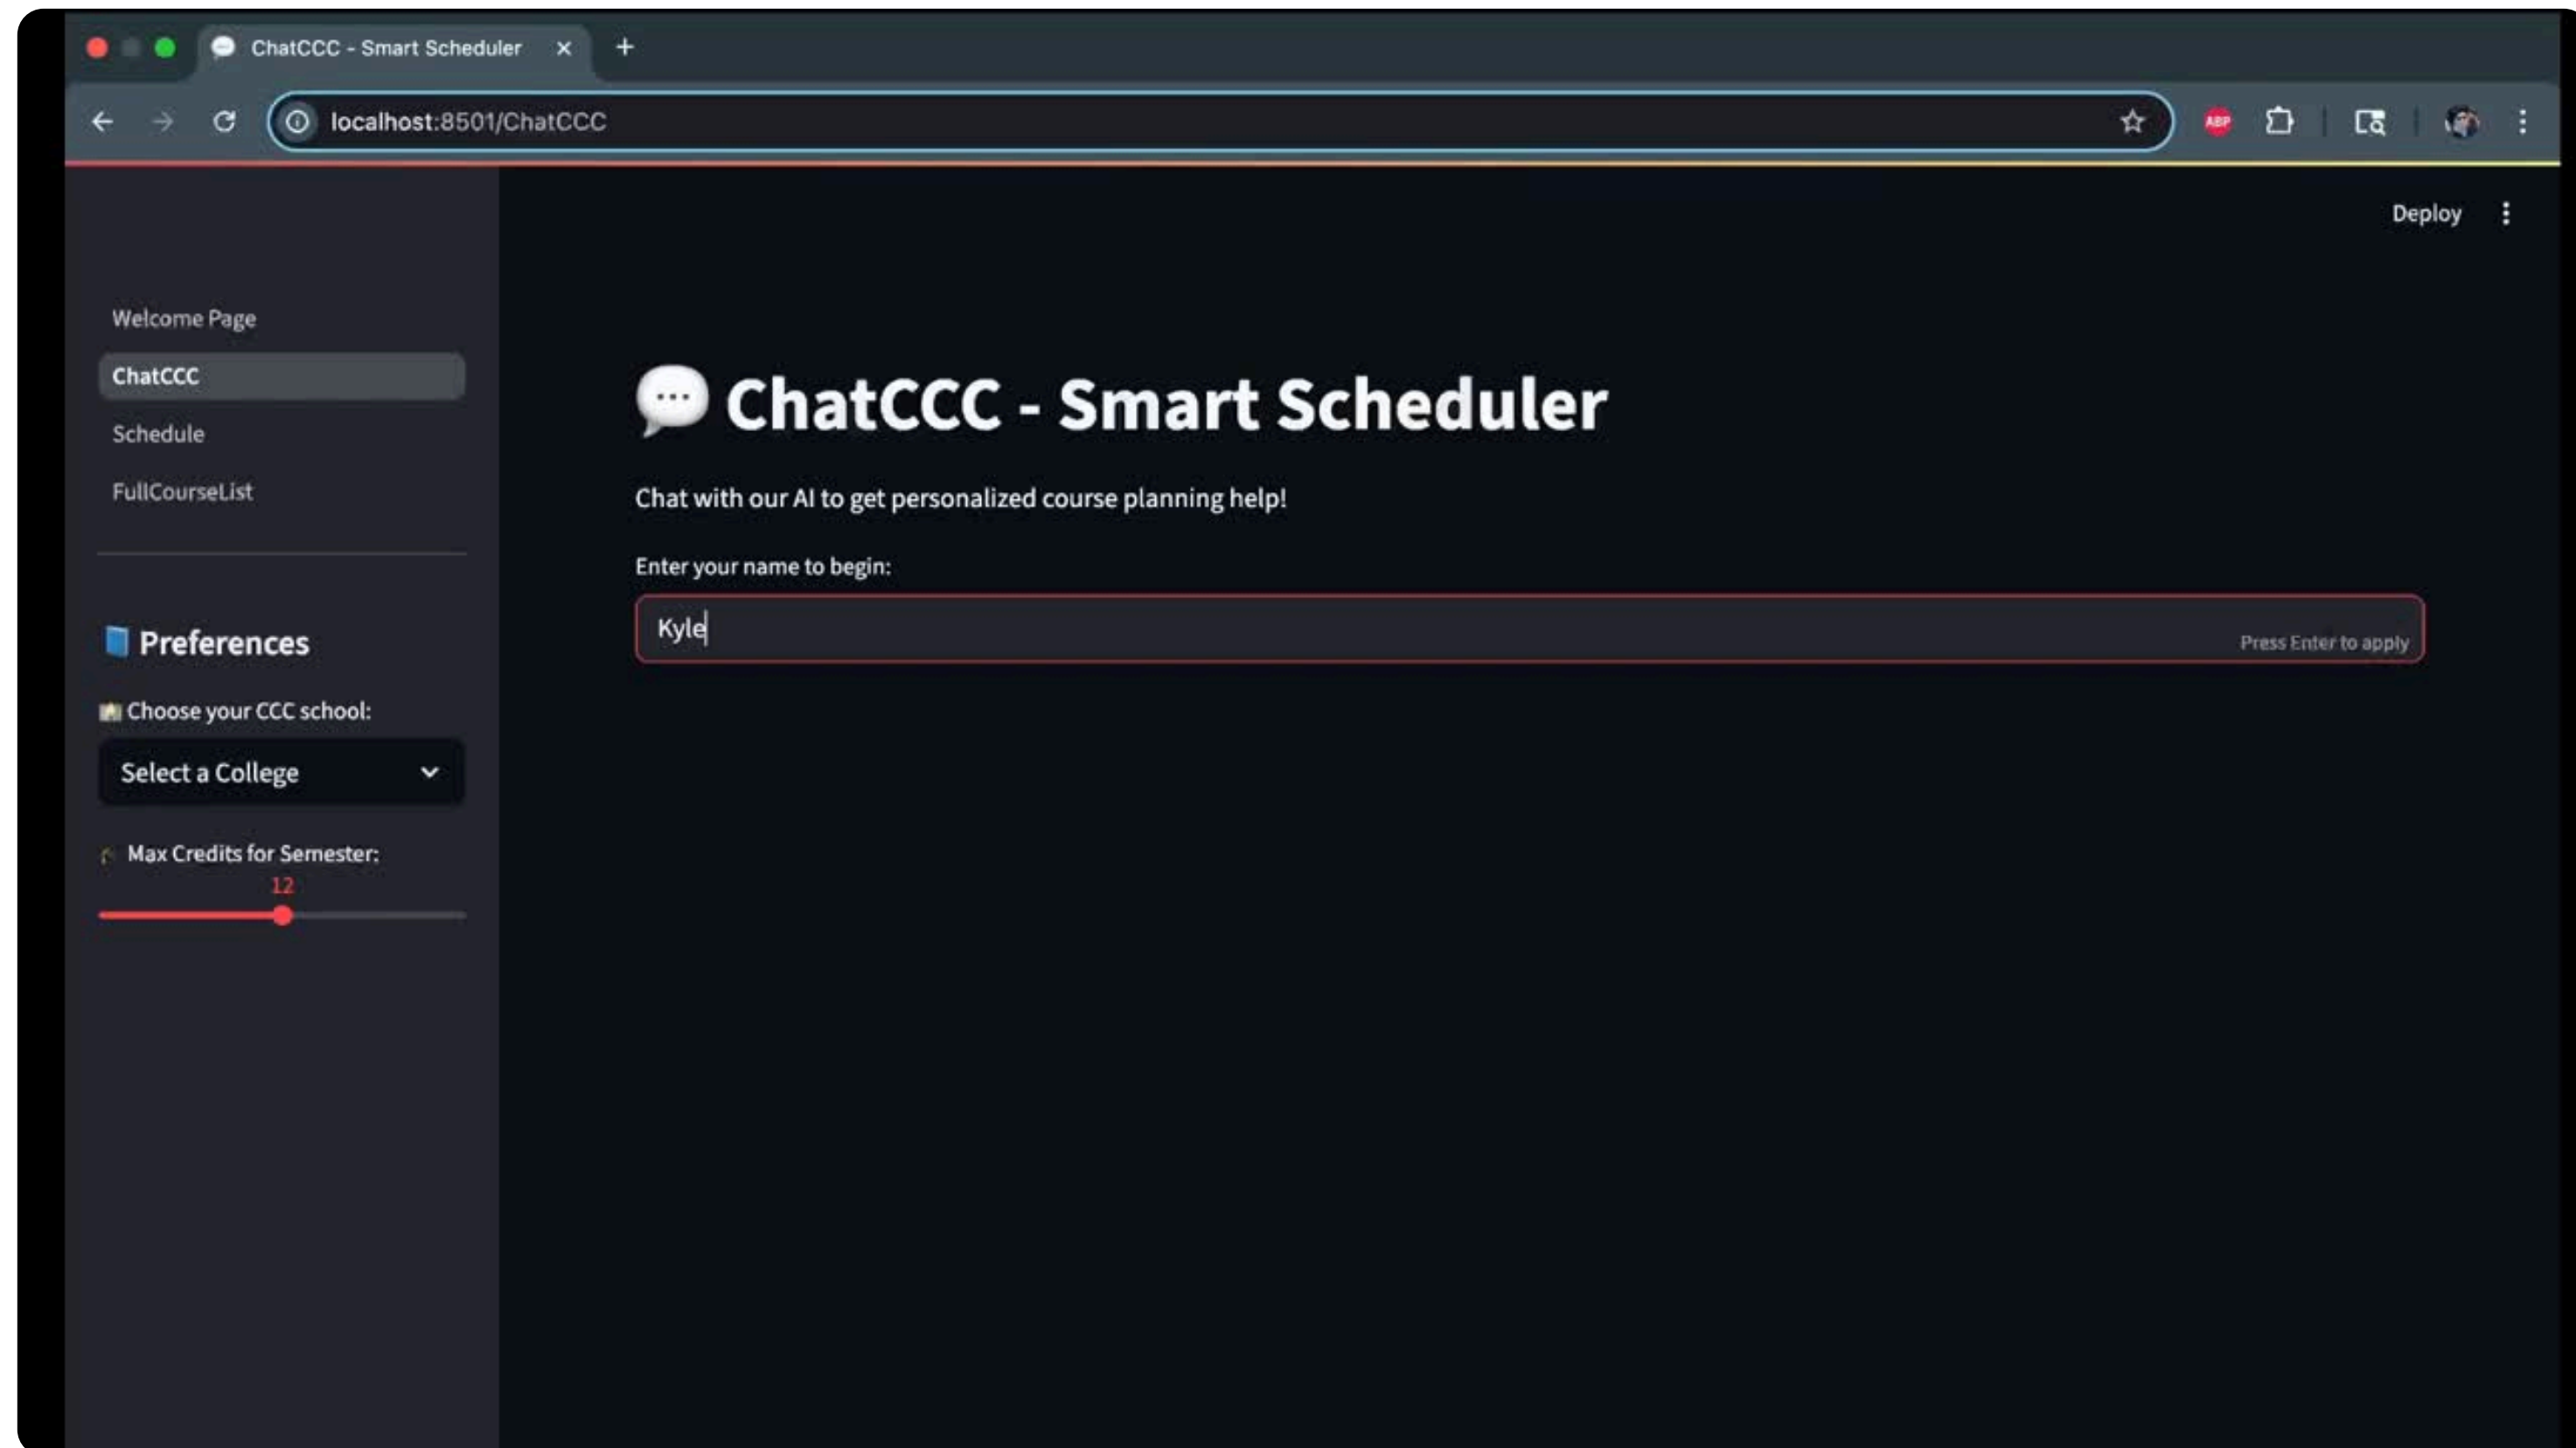

Ease scheduling as a majority of CCC students come from diverse backgrounds that demand much time and effort away from their studies.

## Vision

To streamline student scheduling in the CCC system for students and counselors and minimize the effort it takes to plan out courses that cater to individual goals.
